

## BioBrew Growth

# Maximises Plant Growth & Nutrient Balance

BioBrew Growth is a foliar fertiliser uniquely brewed and rich in calcium and organic nitrogen balanced with phosphate and minor nutrients. It is designed to maximize plant growth and enhance nutrient balance.

### Benefits

BioBrew Growth stimulates root and leaf biology and promotes nutrient balance.

- Stimulates plant natural defence to pest and disease attack.
- Maximises growth and yield potential.
- Increases carbohydrate release through the plant roots which increases diversity of the root biology and reduces the risk of root disease and pathogen attack.
- Improves efficiency of any fertiliser applied to the soil.
- Increases the plants natural Brix (sugar levels). This helps protect the plant from frost.

### Harvesting most energy

Nature's energy flow from sunlight energy to carbohydrate is a complete system. The energy released by BioBrew Growth opens the natural pathways to produce higher quality nutrition.

### Analysis

N	P	K	Ca	S	Humic Acid	Fulvic Acid
1.5%	1.5%	2%	1.5%	0.1%	2.8%	0.5%

Best results when included in a complete biological fertility program to suit your strategy. BioBrew products are designed to stimulate and move soil and plants toward a healthy productive balance.

### Application

Crop	Rate L/Ha	Comment
Broad acre – Dryland	3 - 6 L/ha	Apply from six leaf stage to late tillering or up to preflowering in pulse crops. Dilute min 50L-100L L/Ha of water
Broad acre – Irrigated	3 - 8 L /ha	Always check compatibility if mixing with prescribed soluble nutrients or other chemicals.
Horticulture	8 – 15 L/ha	Apply to crops to stimulate crop growth and leaf production. Dilute 1L:50L of water
Vines, Trees, Turf	8 – 15 L/ha	Apply from fruit set onwards. Dilute 1L:50L of water

### Available in

Bulk, 1000L shuttles, 200 and 20 litre drums
