

BioBrew Soil

Improves the Soil's Natural Organic Cycle

BioBrew Soil is a uniquely brewed product rich in healthy, beneficial soil biology and plant food, including carbon and humates. It is designed to promote diversity and balance in the soil biology.

Benefits

BioBrew Soil stimulates soil biology:

- Increasing the conversion of organic matter to active humus levels, which improves the soils water holding capacity.
- Promoting the desired biological diversity necessary for the natural control of pathogenic organisms.
- Promoting a balanced and diverse nutrient flow that improves crop vigour, enhances yield potential, increases crop resistance to disease.
- Increases crop frost and drought tolerance.
- Improves soil tilth and assisting in the breakdown of hardpans.
- Helps to store the natural pH balance while unlocking nutrient flow to the plant.

A key part of your farming strategy...

BioBrew Soil is a key component to a complete biological soil and crop management strategy. It enhances the effectiveness of all other fertilising programs, especially in conjunction with natural products such as lime and PowerPhos.

Analysis

N	P	K	Ca	S	Zn	Cu	Humic Acid	Fulvic Acid
0.5%	0.05%	1.5%	0.5%	1.5%	2%	1%	2.8%	0.5%

BioBrew Soil can be tailored to meet individual soil test results to include additional trace nutrients. Ideal for all soils...

BioBrew Soil is used on all soil types in broad acre and intensive farming. It is also used in pasture and garden applications.

Application

Crop	Rate L/Ha	Comment
Broad acre – Dryland	3 – 8 L/ha	Apply to moist soil in 50-100L water. Incorporate with seeding or cultivation where possible.
Broad acre – Irrigated	4 – 8 L /ha	Always check compatibility with prescribed soluble nutrients or other chemicals.
Horticulture	6 – 15 L/ha	As above. Can apply through irrigation.
Vines, Trees, Turf	6 – 15 L/ha	Apply to soil under drip line of tree/vine Dilute 1:50L water.

Available in

Bulk, 1000L shuttles, 200 and 20 litre drums.
