

Ausmin Liquid Lime comprises 35% weight/volume Calcium.

At a Glance

- A quick acting, liquid alternative to bulk limestone treatment of calcium deficient soils.
- Suitable for application by boom spray, high flow trickle and aircraft.
- More cost efficient application of soluble calcium than calcium nitrate.
- Ideal when a nitrogen free or organic calcium boost is required.
- Calcium is immediately available after application.
- Micro fine particle size allows calcium to penetrate the soil profile during rain or irrigation. Ideal for minimum till or no till situations.
- A genuine flow able liquid. Liquid Lime is guaranteed not to settle during transport or storage.
- Available in 20lt, 200lt, 1000lt and in bulk.

Liquid Lime

Quick Acting Treatment of Calcium Deficient Soils

Application

Mixing – Fill spray tank with the required amount of water. Add Liquid Lime to tank while agitating. Do not allow Liquid Lime to remain in the tank without agitation operating.

Rates

- Fertigation (not low flow trickle) or Boom Spray (bare ground) – 10-25 litres per Hectare, incorporate into soil with machinery.
- Liquid Injection – 5-10 Litres per Hectare.
- Foliar – 3-5 Litres per hectare in a minimum of 100 litres of water.

Available in

Bulk, 1000L shuttles, 200 and 20 litre drums.
